## About

Passionate **Full Stack Web Developer** with strong expertise in building **secure authentication systems** and scalable web applications. Experienced in technical support and problem-solving, with a BCA degree and a solid foundation in software development, DSA, and modern web technologies.

## Projects

### WICKET

<https://wicket.thevishwa.in/>

Self-Hosted Open Source Authentication System (In Development)

- Developing a fully self-hosted, open-source alternative to paid and vendor-locked solutions like Clerk/Auth0, with focus on JWT-based cross-subdomain authentication.
- Supports modern authentication methods: email & password, social logins (Google, Microsoft, GitHub), Passkeys, TOTP, and Email OTP.
- Architected with Next.js 15, Fastify, PostgreSQL, Valkey (Redis alternative), Prisma, and Zod for scalable and modular development.
- Incorporates security features such as CSRF/XSS protection, with upcoming enhancements like rate limiting.

### EdTechPress

<https://edtechpress.co.uk/>

A freelance responsive website project built with **Django**, HTML, CSS, to showcase book library to potential customers and gain leads, admin can use **CSV files to easily create, manage, and update** Products and categories available on site.

## Experience
